PRODUCT STRATEGY & ROADMAP • CROSS-FUNCTIONAL DELIVERY • SYSTEM & PROCESS DESIGN • WORKFLOW AUTOMATION • CUSTOMER EXPERIENCE • DATA-DRIVEN DECISIONS

PROFESSIONAL SUMMARY

Product Manager with 6+ years of multidisciplinary experience in product delivery, business operations and process improvement across e-commerce, fintech, insurance and enterprise software. I turn ambiguous customer and business needs into product discovery, roadmaps, user stories, service flows, acceptance criteria and measurable outcomes. Experienced in aligning engineering, design, QA, DevOps and operational stakeholders from discovery through testing and release. My hands-on approach combines product thinking, system design, data monitoring and practical workflow automation. I have built a scheduled, read-only monitoring and structured reporting foundation using Python, with an LLM-assisted analysis model designed to support human-reviewed product decisions. I also designed a knowledge-grounded QA/QC AI Bot, local analytics dashboard and controlled performance-reporting workflow for a contact-center team.

CORE COMPETENCIES

Product Strategy & Roadmapping	Product Discovery & Prioritization	Process Architecture & Improvement
Workflow & System Design	User Stories & Acceptance Criteria	Backlog, Sprint & Milestone Planning
Cross-Functional Product Delivery	Customer Journey Mapping	API & Integration Requirements
Product Intelligence & Automation	Python & Task Scheduling	Applied AI / LLM Workflows & QA/QC
CRM, BNPL & Payments	Marketplace & Insurance B2C	Last-Mile & Fulfillment
KPI, SLA & Reporting	User Experience & QA Collaboration	Stakeholder Communication
Operational Analytics	Dashboard & Data Monitoring	SOP / Knowledge Management
Team Coaching & Enablement	Agile / Scrum / Kanban	Decision-Making & Systems Thinking

SELECTED PRODUCT & OPERATIONS PROJECTS · 9 HIGHLIGHTS

- QA/QC AI Bot — TalaLand: consolidated interaction data into a trusted Knowledge Tree; built local Dockerized call/chat/ticket quality review, KPI dashboard, agent rankings and scheduled, role-aware Gmail reports.
- Product Intelligence & Automation — TopTech (Modiran Khodro): built a read-only Python monitoring/reporting foundation with scheduled runs and B2C prioritization; designed Jira/SQLite synchronization and human-reviewed AI analysis workflows.
- BNPL & Installment Gold Purchase — mapped credit eligibility, wallet funding, payment, installments, cancellation and repayment, with requirements and edge cases.
- CRM Action Plan & Knowledge Tree — standardized service taxonomy, call/chat scripts, resolution paths, SLAs, escalation and quality-score criteria.
- Marketplace Expansion — structured seller onboarding, product catalog, inventory accuracy, pricing, availability and fulfillment requirements.
- Super Dashboard & Analytics — aligned sales, conversion, retention, payments, customer signals and data-quality metrics for operational decisions.
- Product & Technical Delivery — converted ambiguous business needs into roadmaps, user stories, API flows, acceptance criteria and coordinated releases.
- CRM Scale & Automation Roadmap — designed phased SOP standardization, performance monitoring, customer routing and AI-assisted classification.
- Unified Credit Back-Office — designed shared provider workflows, case handling, ownership and transparent operations for credit services.

PROFESSIONAL EXPERIENCE

TopTech (Modiran Khodro) — Product Manager

October 2026 | Tehran, Iran | B2C & enterprise systems

- Managed B2C digital product requirements and onboarding journeys at TopTech (Modiran Khodro), covering online insurance, payments, customer experience and service consistency.
- Translated business requests into user stories, workflows, acceptance criteria, backlog priorities and execution-ready tasks; coordinated product, design, frontend, backend, QA and DevOps handoffs.
- Aligned insurance purchasing and issuance flows with API integrations, vehicle-information mapping, payment services and end-to-end test scenarios.
- Monitored technical dependencies across staging, frontend/backend services and production readiness; followed up on blockers and ownership with cross-functional teams.
- Designed and implemented a read-only data-monitoring foundation with Python, scheduled execution, structured local reports and synchronized reporting outputs.
- Developed a Product Intelligence & Automation operating model connecting work signals to ownership, blockers and decision support, with human-reviewed AI/LLM analysis planned as a next-stage capability.
- Helped frame product and system design requirements, shared component dependencies and integration decisions across parallel B2C and enterprise initiatives.

TalaLand — Product Manager

March 2026 – September 2026 | Tehran, Iran | Full-time

- Owned roadmap and product direction across CRM, BNPL, marketplace, payments and last-mile from idea discovery to release and post-release follow-up.
- Managed and prioritized Jira backlogs, user stories, sprint/milestone plans and acceptance criteria, clarifying trade-offs for business and technical teams.
- Worked directly with Engineering, QA, Frontend/Backend, UI/UX and Design to refine edge cases, business rules, API/webhook requirements and regression testing.
- Documented the complete BNPL customer journey: eligibility, validation, wallet credit, purchase, installments, fees, cancellation, early payoff and collections.
- Defined marketplace expansion requirements for sellers, catalog structure, pricing, inventory, availability and fulfillment; used Figma and rapid prototypes.
- Tracked dashboards across sales, conversion, retention, customer feedback, payment and data quality, and aligned stakeholders in Finance, Legal and Marketing.
- Produced a verified reporting snapshot for 5 Mordad–10 Shahrivar 1405: 2.220B IRR sales, 58 delivered orders, 25 unique buyers, 76.922g sold and approximately 155% period-over-period growth.

PROFESSIONAL EXPERIENCE / CONTINUED

TalaLand — Business Process & Operations Lead

November 2025 – February 2026 | Tehran, Iran | Full-time

- Led design, optimization and scaling of core workflows across CRM, retention, marketplace, BNPL, payments, logistics and internal operations.
- Turned ambiguous business problems into operational flows, decision trees, SOPs, structured dashboards and executable requirements.
- Designed the CRM Action Plan and verified Knowledge Tree, consolidating fragmented call/chat knowledge into service taxonomy, decision paths, SLAs, quality rubrics and actionable follow-ups.
- Designed a local, Dockerized QA/QC AI Bot against the knowledge base for evaluating calls, chats and tickets; connected a local KPI/ranking dashboard and role-aware Gmail reporting.
- Created operational journeys for Hot Call, failed payments, retention, beta activation, abandoned checkout recovery and high-value customer follow-up.
- Structured seller onboarding, catalog taxonomy, vendor readiness, price and stock accuracy, fulfillment ownership and SLA monitoring.
- Built reporting across conversion, retention, CRM, customer feedback, payments and data quality, distinguishing live database snapshots from management reporting.
- Led CRM enablement through onboarding, practice guides, knowledge bases, coaching, task prioritization and continuity procedures.

SnappMarket — Operations Incharge

December 2024 – November 2025 | Tehran, Iran | Hybrid

- Led operations and customer service workflows, coaching teams and aligning execution with quality standards and customer experience.
- Managed key merchant/account relationships, investigated operational and commercial bottlenecks and drove data-informed process improvements.
- Served as an escalation point for high-priority VOC cases and managerial complaints through root-cause analysis and cross-team coordination.
- Monitored customer/order behavior to identify fraud-risk patterns while minimizing friction for regular users.
- Optimized last-mile and fulfillment through capacity planning, fleet monitoring, prioritization and peak-period response.
- Used Excel, Google Sheets, Power BI, Tableau and internal reporting to monitor FCR, AHT, CSAT, NPS and abandonment.

PROFESSIONAL EXPERIENCE / CONTINUED

SnappMarket — Operations Expert

January 2024 – December 2024 | Tehran, Iran | Hybrid

- Managed and monitored collection, packaging, shipping, fulfillment and last-mile operations in a fast-paced marketplace environment.
- Prioritized real-time execution during peak periods, sustaining service continuity and coordinating response to disruptions.
- Bridged Operations and Support to identify systemic service gaps, improve issue resolution and strengthen service quality.
- Supported onboarding and mentoring by sharing operating procedures, feedback and best practices.

SnappMarket — VOC Specialist

July 2023 – January 2024 | Tehran, Iran | Hybrid

- Analyzed customer and internal-team feedback to identify recurring friction points, operational defects and opportunities to improve customer experience.
- Handled escalated concerns across calls, chats and tickets, investigated root causes and coordinated resolution with internal stakeholders.
- Converted VOC patterns into actionable process-improvement inputs rather than treating complaints as isolated interactions.

EARLIER EXPERIENCE

- Medical Laboratory Expert — Iranian Hospital Dubai | Apr 2022 – Jun 2023 | Sample collection, analyzer operation and quality-control procedures.
- Public Health Supervisor — Iran University of Medical Sciences | Jul 2021 – Apr 2022 | Shift planning, vaccination workflows and cold-chain/PPE compliance.
- Public Health Specialist — Iran University of Medical Sciences | Feb – Jul 2021 | High-volume public-health services, documentation and safety standards.
- Biology & English Educator — National Organization for Development of Exceptional Talents | Oct 2020 – Sep 2021 | Teaching and knowledge transfer.
- Coordination Specialist — Everest Modern Pars Chain Stores | Mar – Aug 2020 | Cross-team coordination and retail operations.

EDUCATION

- MBA-Equivalent Graduate-Level Business Administration Course — University of Tehran | 1404–1405 SH; continuing professional business learning.
- B.Sc. Biology — Islamic Azad University, Tehran Central Branch | 1399–1404 SH | GPA 18.23/20.

PRODUCT & BUSINESS TRAINING

Course	Provider	Year (SH)	Duration
Product Management	Bozhan Product School	1404	1 year
AI for Business	Bozhan Product School	1405	6 months
Agile Management (Scrum, Kanban & Lean)	Maktabkhooneh	1404	6 months

TOOLS & TECHNICAL SKILLS

Product & Design: Jira (epics, backlog, sprints, user stories), Figma, discovery, journey mapping, flowcharts, wireframing, requirements, system design, Visio and mind mapping.

Automation & Applied AI: Workflow Automation, Product Intelligence, Python, Docker containers, scheduling, API integration, Knowledge Tree/QA-QC automation, Gmail reporting, structured monitoring, LLM-assisted analysis and AI-assisted coding / prototyping.

Engineering & Delivery: HTML, CSS, JavaScript, API & webhooks, GitHub, Git concepts, Agile, Scrum, Kanban, QA scenarios, acceptance criteria, release readiness.

Analytics & Reporting: Power BI, Tableau, Looker Studio, Google Analytics, Tag Manager, advanced Excel/Google Sheets, SQL/ Metabase, Oracle Database, KPIs/SLAs (FCR, AHT, CSAT, QA score), agent coaching, rankings and local analytics dashboards.

Operations & Systems: CRM, BNPL, payment operations, marketplace, last-mile/fulfillment, SOP, process architecture, stakeholder mapping, risk and service monitoring.

Planning & Collaboration: Microsoft Project, PowerPoint, Word, Access, Outlook, Google Workspace, task ownership, stakeholder management and cross-functional coordination.
