PRODUCT VISION & ROADMAPPING • CROSS-FUNCTIONAL LEADERSHIP • USER STORIES & BACKLOG • WORKFLOW & SYSTEM DESIGN • DATA-DRIVEN DECISIONS • STAKEHOLDER COMMUNICATION • OPERATIONS SCALE

PROFESSIONAL SUMMARY

Operations and process leader with a product vision mindset and 6+ years of experience turning ambiguous business problems into shipped workflows, product requirements, and measurable outcomes. Currently owning product and process direction at TalaLand end-to-end — from idea and mind-mapping through user stories, backlog, sprints, and release — across CRM, BNPL, marketplace, payments, and last-mile domains. Comfortable holding the whole product lifecycle while designing operational flows, SOPs, dashboards, and acceptance criteria. I sit directly with Engineering, QA, Backend/Frontend, UI/UX, and Design to define edge cases and API/webhook needs, then track work through to closure. Known for collaboration, clear communication, and bringing Business, Product, Technical, CRM, Finance, Legal, and Marketing into one decision that connects vision to operational reality.

CORE COMPETENCIES

Business Process Design	Product Strategy & Roadmapping	Process Improvement
Workflow & Process Design	Backlog, Sprint & Milestone Planning	User Story Writing
Product Operations	Idea-to-Execution Framing	Mind Mapping & Ideation
Customer Journey Mapping	Cross-Functional Collaboration	Stakeholder Communication
BNPL & Payment Operations	Marketplace Operations	Last-Mile & Fulfillment
KPI / SLA Management	Dashboard & Reporting Systems	SOP / Knowledge Base
Operational Analytics	API & Technical Fluency	QA & Release Quality Control
Vendor / Provider Management	Team Coaching & Enablement	Data-Driven Decision Making

SELECTED PRODUCT & OPERATIONS PROJECTS

- CRM Action Plan & Knowledge Tree — full operating model: decision paths, scripts, permissions, follow-up states, and outcome tracking for CRM call/chat.
- BNPL & Installment Gold Purchase — end-to-end journey design from eligibility through collections and provider coordination.
- Marketplace Expansion — seller onboarding, catalog taxonomy, vendor readiness, pricing, and fulfillment structure for gold jewelry and accessories.
- Super Dashboard & Analytics — unified reporting across sales, conversion, retention, CRM, and data quality, connecting campaign, call, and purchase signals.
- Product & Technical Delivery — translated business problems into flows, rules, edge cases, acceptance criteria, and QA scenarios across Product, Backend, Frontend, and QA.
- CRM Scale & Automation Roadmap — staged plan from manual execution to SLA/KPI monitoring, automation, and AI-assisted classification.

PROFESSIONAL EXPERIENCE

TalaLand — Product Manager

March 2026 – Present | Tehran, Iran | Full-time

- Own product direction and roadmap end-to-end across CRM, BNPL, Marketplace, Payments, and last-mile — from idea and mind-mapping to backlog, sprints, and release.
- Manage and prioritize the backlog in Jira — grooming, sprint and milestone planning, release readiness — turning business problems into user stories, flows, and acceptance criteria.
- Sit closely with Engineering, QA, Backend/Frontend, UI/UX, and Design to define flows, edge cases, acceptance criteria, and API/webhook needs, then track work through retest, regression, and closure.
- Designed and documented the full BNPL customer journey covering eligibility, form completion, validation, wallet credit, purchase, installment plans, service fees, cancellation, early payoff, collections, and provider coordination.
- Define product requirements for Marketplace expansion — seller onboarding, catalog taxonomy, pricing, inventory, and fulfillment — and validate flows with UI/UX in Figma and AI-assisted prototypes before development.
- Maintain product dashboards and reporting for sales, conversion, retention, CRM, payment, and data quality to track feature impact and guide prioritization.
- Coordinated cross-functional execution with CEO/Founders, Product, Engineering, Design, Marketing, Finance, Security, Legal, and CRM teams to turn operational and product needs into prioritized, executable work.
- Turn CRM and customer feedback into backlog items; communicate roadmap, status, and trade-offs to stakeholders.
- Produced a verified sales snapshot for 5 Mordad–10 Shahrivar 1405: 2.220B IRR sales, 58 delivered orders, 25 unique buyers, 76.922g sold, 36 unique products, 4 stores, and approximately 155% period-over-period growth.
- Documented a staged roadmap from manual execution to standardized workflows, automation, and AI-assisted operations while keeping product vision and operational reality tightly aligned.

TalaLand — Business Process & Operations Lead

November 2025 – February 2026 | Tehran, Iran | Full-time

- Lead the design, optimization, and scaling of core business workflows across CRM, Customer Retention, Marketplace, Payment, BNPL, Logistics, and internal operations, while maintaining a strong product vision throughout the process.
- Translate ambiguous business problems into clear operational flows, decision paths, SOPs, dashboards, and executable requirements — working daily with product thinking from problem framing to measurable outcomes.
- Designed and implemented the CRM Action Plan and Knowledge Tree covering call/chat scripts, customer issues, decision paths, ticketing, reminders, escalation, and outcome tracking to standardize customer handling.
- Built operational workflows for Hot Call, Failed Payment, Retention, Beta Activation, abandoned checkout recovery, and high-value customer follow-up; defined owner, SLA, stage, outcome, and next action for each flow.
- Created and improved operational structures for Marketplace seller onboarding, catalog taxonomy, vendor readiness, product availability, pricing, inventory, fulfillment, SLA, and customer leakage risk.
- Built operational dashboards and reporting for sales, conversion, retention, CRM, customer feedback, payment, product, and data quality — separating live database snapshots from management reporting.
- Led CRM team enablement through onboarding, practice material, scripts, knowledge base, task prioritization, performance monitoring, and continuity procedures.

PROFESSIONAL EXPERIENCE / CONTINUED

SnappMarket — Operations Incharge

December 2024 – November 2025 | Tehran, Iran | Hybrid

- Led daily operations and customer service workflows, setting performance expectations, coaching team members, and reinforcing accountability and customer-centric execution.
- Managed strategic merchant and account relationships; monitored performance, identified operational and commercial bottlenecks, and coordinated data-informed improvement actions.
- Acted as a primary escalation point for high-priority VOC cases and managerial complaints by performing root-cause analysis, stakeholder mediation, and structured resolution design.
- Monitored user behavior, account activity, transactions, and order patterns to identify fraud risk and implement preventive actions without unnecessary friction for regular customers.
- Optimized last-mile and fulfillment operations through capacity planning, fleet performance monitoring, real-time crisis handling, prioritization, and peak-period continuity.
- Built recurring reporting and analysis using advanced Google Sheets, Excel, Power BI, Tableau, and internal dashboards; monitored FCR, AHT, CSAT, NPS, and Abandoned Rate.
- Designed training plans, workshops, and coaching routines for customer service and quality-control capability development.

SnappMarket — Operations Expert

January 2024 – December 2024 | Tehran, Iran | Hybrid

- Managed and monitored collection, packaging, shipping, fulfillment, and last-mile workflows while coordinating operational execution in a fast-paced marketplace environment.
- Prioritized tasks and coordinated real-time operations during high-volume periods to maintain service continuity and reduce delays.
- Bridged Operations and Support teams to resolve systemic issues, identify process gaps, improve issue resolution, and strengthen service quality.
- Supported onboarding and mentoring of new team members by sharing operational knowledge, best practices, and structured feedback.

SnappMarket — VOC Specialist

July 2023 – January 2024 | Tehran, Iran | Hybrid

- Analyzed customer and internal-team feedback to identify recurring service challenges, operational defects, and opportunities to improve the user experience.
- Handled customer concerns across calls, chats, and tickets; managed expectations, investigated root causes, and provided structured resolutions in collaboration with internal teams.
- Converted recurring VOC themes into actionable process-improvement inputs, helping teams identify systemic issues instead of treating cases as isolated interactions.

EARLIER EXPERIENCE

- Medical Laboratory Expert — Iranian Hospital Dubai | Apr 2022 – Jun 2023 | Sample collection, analyzer operation, and quality-control procedures for complex patient groups.
- Vaccination & Public Health Supervisor — Iran University of Medical Sciences | Jul 2021 – Apr 2022 | Led COVID-19 vaccination workflows, shift planning, and cold-chain/PPE compliance.
- Vaccination & Public Health Specialist — Iran University of Medical Sciences | Feb 2021 – Jul 2021 | High-volume vaccination delivery under strict safety and documentation standards.
- Biology & English Educator — National Organization for Development of Exceptional Talents | Oct 2020 – Sep 2021 | Adaptive teaching and knowledge-transfer for learners.
- Coordination Specialist — Everest Modern Pars Chain Stores | Mar 2020 – Aug 2020 | Cross-team coordination and retail-operations execution.

EDUCATION

- MBA-Equivalent Graduate-Level Course (Business Administration) — University of Tehran (currently continuing toward a DBA, completing the academic side of my technical career track in this field)
- B.Sc. Biology — Islamic Azad University, Tehran Central Branch | 1399 – Present
- Associate Degree, Medical Laboratory Sciences — Shahid Beheshti University of Medical Sciences | 1401 | GPA 19.65/20
- Associate Degree, Public Health — Iran University of Medical Sciences | 1400–1401 | GPA 19.59/20

PRODUCT & BUSINESS TRAINING

Course	Provider	Year (SH)	Duration
Product Management	Bozhan Product School	1404 SH	1 year
AI for Business	Bozhan Product School	1405 SH	6 months
Agile Management (Scrum, Kanban & Lean)	Maktabkhooneh	1404 SH	6 months

TOOLS & TECHNICAL SKILLS

Product & Design: Figma; Jira (backlog, sprints, epics); mind mapping tools; basic HTML; AI-assisted / vibe-coding prototyping.

Agile & Delivery: Agile, Scrum, Kanban; sprint and milestone planning; backlog management; hands-on daily product and operations use.

Data & Reporting: Power BI; Tableau; Google Analytics; Google Tag Manager; Looker Studio; advanced Excel and Google Sheets; Metabase; Oracle Database.

Planning & Documentation: Microsoft Project, Visio, PowerPoint, Word, Access, and Outlook.

AI & Development: AI Search, Research & Productivity; Agentic AI & AI Application Development; AI Coding & Software Engineering.

Process & Quality: User story writing; acceptance criteria; 5W1H problem framing; QA/release checks; CRM systems; data-driven and AI-assisted decision-making.

LANGUAGES & RECOGNITION

English: Advanced | Arabic: Intermediate | German: Basic | French: Basic

Commendation from the Ministry of Health and Medical Education for contribution to the Bostan-e Goftgoo COVID-19 vaccination center, 1400 SH.
